

## Weather Delays Demolition at East Gate

The heavy rain and thunderstorms occurring will delay the demolition of the Fountainbleau (East) Gatehouse. The contractor has tentatively rescheduled the demolition for tomorrow, Thursday, April 14<sup>th</sup>. The demolition work can happen during rain without thunder and lightning. However, the forecast for Thursday is not favorable as well. Friday's forecast is looking more favorable. During demolition, there will be minor traffic flow re-routing to avoid the demo work. There will be traffic control personnel and signage used to direct the entering and exiting traffic around the site.
